WHAT IS A GYNECOLOGIC ONCOLOGIST?

A gynecologic oncologist is a doctor trained in obstetrics and gynecology who has three to four years of additional training in the surgical management, treatment and surveillance of gynecologic cancers. These specialists combine their knowledge of gynecology with expertise in detecting and treating cancers of the female reproductive system. They apply the best medical thinking and practices to each patient's care. Their surgical skills are highly developed and include training in advanced surgical methods and treatment for complicated gynecologic surgical conditions in high-risk patients.

OHC's gynecologic oncologists are among a select group of approximately 500 in the United States who are certified by the American Board of Obstetrics and Gynecology.

WHAT IS GYNECOLOGIC CANCER?

Gynecologic cancers attack a woman's reproductive organs, including the cervix, uterus, ovaries, fallopian tubes, vagina and vulva. Each year, over 110,000 women are diagnosed with cancer of the reproductive organs.

OHC provides you with the most experienced gynecologic oncologists, the latest therapies, and the most promising new treatments to surround you with everything you need to focus on what matters most – beating cancer.

OUR APPROACH TO GYNECOLOGIC CANCER CARE

Your OHC doctors and multidisciplinary care team will guide you along each step of care, from diagnosis through treatment and survivorship. We will discuss your individual life circumstances as they relate to your care, and create a personalized treatment plan for your cancer. This may include:

- Robotic-assisted surgery
- Laparoscopic surgery
- Traditional surgery
- Immunotherapy
- Chemotherapy
- Radiation therapy
- Clinical trials
- Genetic testing
- Hormonal therapy
- Supportive Care Program
- Survivorship

OHC CLINICAL TRIALS

OHC's team of cancer experts use the most advanced treatments for your plan of care, and has a nationally-recognized clinical trials program that evaluates the newest, most promising cancer treatments. OHC also partners with US Oncology Research, which sponsors more than 400 Phase 1 – 4 clinical trials. Ask your care team if a clinical trial is available for you.

YOUR HEALTH CARE TEAM

Each member of your OHC care team plays an important role in your care and is available to address any questions or concerns you may have about your treatment. **Members of your team include:**

- **Gynecologic Oncologist:** Doctor who specializes in cancers of the female reproductive organs
- **Medical Oncologist:** Doctor who specializes in the field of chemotherapy, immunotherapy, targeted medicine, and other medications
- **Radiation Oncologist:** Doctor who specializes in the field of therapeutic radiation
- **Advanced Practice Provider:** A medical provider with a Master's Degree or higher who can diagnose and treat patients
- **Nurse Navigators:** Registered nurses who work directly with you and other members of the care team to navigate you through diagnosis, treatment and follow-up
- **Research Nurses:** Specially-trained registered nurses who work directly with a patient's doctor to coordinate care and treatment if you are participating in a clinical trial
- **Medical Assistants:** Medical personnel who meet with you at the beginning of each visit, schedule diagnostic tests, assist with procedures and draw blood samples
- **Financial Navigators:** OHC financial navigators help you with financial questions and concerns, including billing, financial assistance, or payment plans
- **OHC Pharmacists:** Knowledgeable pharmacists who specialize in cancer-related medications and treatments. They work directly with your OHC doctors, advanced practice providers, nurses and other members of your care team
